

WHAT IS CLAIMED IS:

1. A powder body metering apparatus comprises a metering container including an inlet in an upper end, and a switch valve for opening and closing the inlet of the metering container, wherein an internal capacity of said metering container is variable, and has a first opening in a lower portion and a second opening in a desired portion.
2. A powder body metering apparatus as claimed in claim 1, wherein a powder body discharge port is formed in the lower portion of the metering container, and the powder body discharge port is freely opened and closed by a closing member.
